Science Fair Research Development

Topic : _____

Start-up Questions :

Investigative Questions

List as **many questions as you can think of** that relate to the topic you have chosen for your Science Fair project. Think about the information that you need to know to become a "semi-expert" on your topic. These investigative questions will help to guide your background research. Your oral exam will in all probability consist of questions very similar to the investigative questions you come up with and answer. Number each question; use a separate sheet of paper if necessary. HINT: The more investigative questions you have, the easier your research will be.
