

Data Tables Notes

Function : to organize data

Benefit : 1) makes it easier to see patterns
2) makes it easier to interpret the data

Requirements : 1) columns (independent variable)
2) rows (dependent variable)
3) headings
4) title
5) figure heading
6) drawn with a ruler

Example :

Comparing the number of boys and girls at each lab table

Table Number	Number of Boys	Number of Girls
1		
2		
3		
4		
5		

Figure 1. A data table showing the number of boys and girls sitting at each lab table in the Class.
